

CODY BRUNNER

Senior Software Engineer | 8+ Years Building for the Web

me@codybrunner.com | linkedin.com/in/cody-brunner | codybrunner.com

PROFESSIONAL SUMMARY

Senior software engineer with 8+ years building production web applications across fintech, scheduling, developer tools, and enterprise SaaS. Comfortable across the full stack from UI through database, with deep expertise in TypeScript and the modern JS/Node ecosystem. AWS Certified Cloud Practitioner; productive with agentic coding workflows.

AREAS OF EXPERTISE

- HTML, CSS, JavaScript & TypeScript
- Next.js (App Router, RSC)
- SvelteKit & Svelte 5
- Node.js & Bun
- Tailwind CSS & shadcn/ui
- TanStack
- Drizzle, Postgres & SQLite
- REST, GraphQL & tRPC
- AWS, Cloudflare & Vercel
- Vitest & Playwright
- Agentic Coding
- CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Software Developer | Mar 2025 – Present

Flexera, Itasca, IL, USA

Joined to lead Spot Eco Azure integration into the Flexera ecosystem (~1,000 active users); now driving full-stack development on Flexera One as the company consolidates acquired products onto the unified platform.

- Spearheaded the integration of Spot Eco Azure into the Flexera ecosystem, enabling unified cloud cost management for ~1,000 active users alongside Flexera's broader hybrid IT product suite.
- Leading frontend UI/UX redesign of Spot Eco Azure, aligning the acquired product's visual language with Flexera's design system to support a smoother user migration.
- Building full-stack custom dashboard infrastructure for Flexera One using Cube.dev and Embeddable.dev, leveraging agentic coding workflows to accelerate development on customer-configurable analytics across the platform.
- Partnering directly with Cost Specialists and cross-functional teams to translate business requirements into shipped product features.

Founder & Open-Source Contributor | Feb 2022 – Present

JokinglyBadTech LLC, Cheyenne, WY, USA

Operates an independent software practice focused on open-source tooling, cloud automation, and developer experience for the modern web ecosystem.

- Maintains [rehype-code-titles](#), an open-source npm package with ~4,500 weekly downloads, used across hundreds of markdown processing pipelines in the developer ecosystem.
- Architects cloud-based automation solutions for client projects, reducing build, deployment, and operational overhead.
- Delivers freelance work across React, TypeScript, Tailwind, Go, and Elixir, shipping scalable solutions for clients across multiple industries.

Senior Frontend Developer | Oct 2022 – Aug 2024

WAO Fintech (Bitcoin IRA), Sherman Oaks, CA, USA

Owned the frontend stack for a regulated retirement-investing platform, partnering with backend and compliance teams to ship secure, customer-facing experiences.

- Architected and maintained critical Bitcoin IRA frontend applications using React, Remix, and TypeScript on Azure infrastructure.
- Built secure API integrations for sensitive financial transactions, implementing robust authentication protocols and ensuring regulatory compliance.
- Led the refactor of core UI components, improving application load times by 40% and measurably enhancing user experience.
- Mentored junior developers and established frontend best practices across the organization.

Frontend Developer | Oct 2021 – Oct 2022

Appointlet, Portland, OR, USA

Returned to Appointlet to modernize the V5 dashboard architecture, with a focus on maintainability, performance, and end-user experience.

- Spearheaded the modernization of Appointlet's V5 architecture with a component-driven approach, reducing bundle size by 30%.
- Reduced initial load times by 25% through code splitting and lazy loading, directly improving user satisfaction and engagement metrics.
- Developed and enhanced the scheduling dashboard UI, incorporating user feedback to streamline appointment booking workflows.

Web Developer | Sep 2018 – Apr 2021

Appointlet, Portland, OR, USA

Joined Appointlet as a full-stack web developer, contributing across the marketing site, public booking flow, and the Chrome extension.

- Designed and launched the Appointlet Chrome Extension, increasing user adoption by 22% by streamlining scheduling workflows.
- Developed a responsive client-side booking system with real-time backend synchronization, ensuring reliable scheduling across time zones.
- Championed SEO and WCAG-compliant accessibility improvements across the platform, driving a 35% increase in organic traffic.
